## More than 10% of all Cement Used in the United States is

This is the Cement age—in the United States yearly the consumption is ONE BARREL FOR EVERY PERSON—cement is used everywhere—for every conceivable purpose.

Cement has made possible the world's greatest engineering triumphs—canals—dams—irrigation projects—subways, etc. It enters into the construction of our homes—factories—public buildings—garages—streets—roads—sidewalks—bridges—railroads—piers—etc. The farmer uses it for barns—floors—silos—cisterns—water troughs—fence posts—etc.

Cement makes possible fire-proof concrete construction and will last forever. Directly or indirectly every person in the United States uses cement. You should know of the adaptability of cement construction. You should know about Lehigh, and the reasons which make it the National Cement—WHY 10% of all the cement used in the United States is LEHIGH, the remaining nine-tenths being manufactured by every one building other companies.

## Ham Honesty

YOU wouldn't give a child a bottle of poison to play with.

Yet when you let a child eat ham that is unreliable you run about the same risk.

Some ham, as you very well know, is not fit to eat. It's not properly cured, and it's kept from rotting by poisonous preservatives barred by the pure food law.

It is your duty to buy ham only where you know you'll get the real article. This is most important. Buy here.
